

Linear Function Word Problems With Solution

Linear Function Word Problems With Solution - Linear Functions Problems with Solutions. Linear functions are highly used throughout mathematics and are therefore important to understand. A set of problems involving linear functions, along with detailed solutions, are presented. The problems are designed with emphasis on the meaning of the slope and the y intercept. Worked-out word problems on linear equations with solutions explained step-by-step in different types of examples. There are several problems which involve relations among known and unknown numbers and can be put in the form of equations. Linear Function Word Problems

1. Three pounds of squid can be purchased at the market for \$18.
2. It has been observed that a particular plant's growth is directly proportional to time.
3. A car rental charge is \$100 per day plus \$0.30 per mile travelled.
5. The pollution level in the centre... You would not imagine how often linear functions are found in everyday problems. These problems will give you a glimpse.
